**Company:** Solda Inox Mendez SAC

**Period:** January 2021 - Present

**Position:** TIG Welder

**Responsibilities:**

Welder and assembler of structures based on blueprint readings. Customer service when selling products related to the field.

- Example: "I am responsible for assembling and sometimes preparing the material for the structure, then assembling and welding, all following the necessary process required by the different materials used in the fabrication of these structures."
- Additionally, I assist customers looking for materials and accessories used and sold in our store. In this way, I contribute to the development of the company in different areas effectively.

### PROJECTS

**Name:** Shaddai

**Description:** Virtual store for selling Bibles. This website helps to streamline sales on a larger scale since currently, sales are only made in physical stores.

**URL:** [www.shaddai.com](http://www.shaddai.com)

**Name:** Munay

**Description:** Virtual store for selling ice cream. With this website, we aim to expand

the sales of this venture and thus increase recognition at the regional level and then progressively scale up.

**Period:** Oct-2023 - Feb-2024

**Course:** Full Stack Dev

**Institution:** Senati

**Period:** Feb-2021 - Paused at the beginning of the 4th cycle

**Course:** Web Design and Development

## **CERTIFICATIONS**

English B1

## **SKILLS**

### *Soft Skills*

- **Effective Communication:** Ability to explain complex concepts clearly and understandably to both technical colleagues and non-technical stakeholders.
- **Teamwork:** Collaborate effectively with other developers, designers, and project managers to achieve common goals.
- **Attention to Detail:** Ability to detect errors and optimize code, ensuring the quality and functionality of the final product.
- **Proactive Attitude:** Take the initiative to improve processes, learn new technologies, and bring innovative ideas to the team.
- **Adaptability:** Ability to quickly adjust to new tools, technologies, and methodologies, maintaining a flexible approach to changes in project requirements.

### *Strong Skills*

- **JavaScript & TypeScript:** Extensive knowledge in creating dynamic and scalable applications using JavaScript and TypeScript, ensuring clean and maintainable code.
- **React & Redux:** Experience in developing interactive and efficient user interfaces using React and Redux, with a focus on application state management.
- **Node.js & Express:** Expertise in building efficient and scalable backend applications using Node.js and Express, facilitating smooth communication between frontend and backend.
- **APIs:** Proficiency in designing, creating, and integrating RESTful APIs to enable seamless data exchange between systems.
- **MySQL & PostgreSQL:** Strong experience in database management, including schema design, query optimization, and data integrity using MySQL and PostgreSQL.
- **HTML & CSS (including SASS):** Ability to structure semantic and well-organized web content with HTML and design attractive and responsive user interfaces using CSS and SASS.
- **React Native:** Capability to develop cross-platform mobile applications using React Native, providing a consistent user experience on iOS and Android.

- C#: Solid understanding of backend development using C# within the .NET framework, including creating robust web services and APIs.
- MVC Framework: Knowledgeable in implementing the Model-View-Controller (MVC) architecture to build modular and maintainable applications.
- Firebase Authentication: Experience in implementing secure authentication and user management using Firebase Authentication, enhancing the security of applications.
